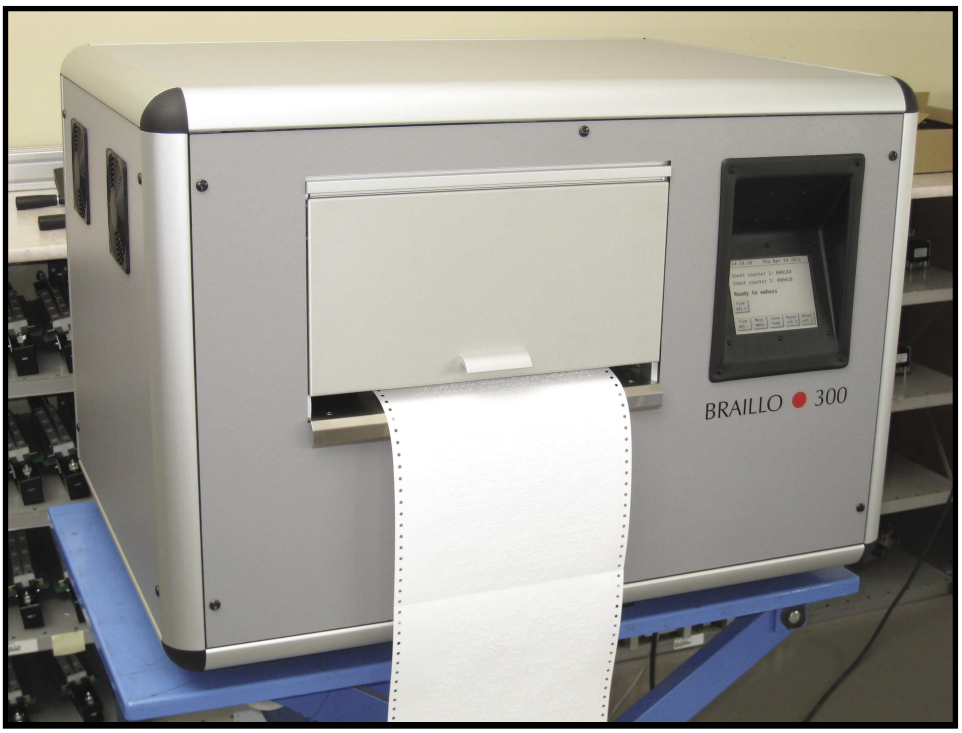
BRAILLO FirmWare upgrade



User's Guide

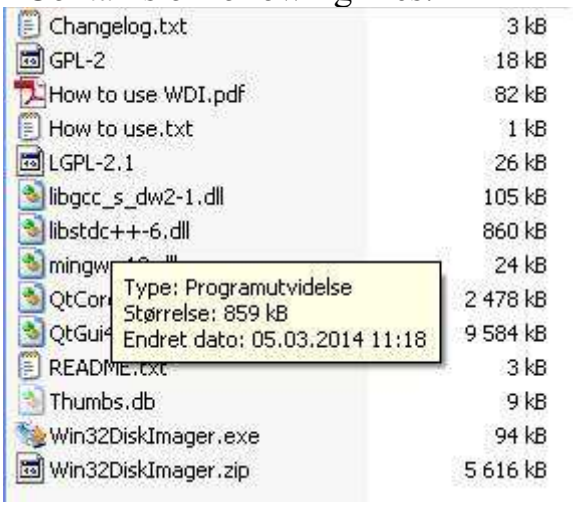
BRAILLO NORWAY

Rev. Feb. 2015

February 2015, © - 2012 Braillo Norway AS

The following files are needed:

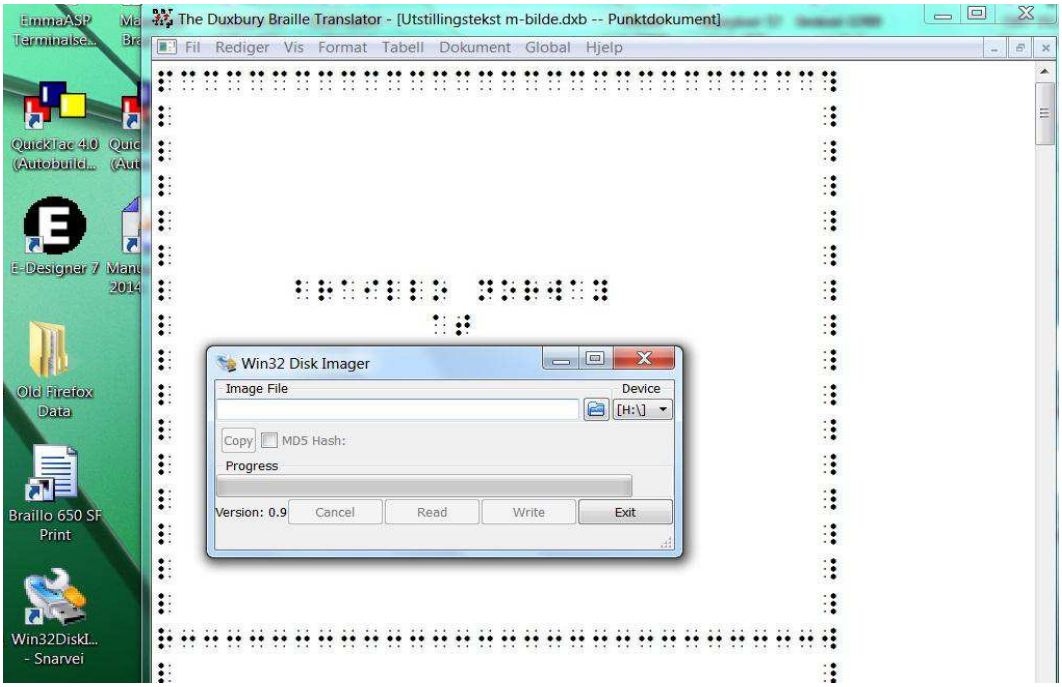
1. Win32DiskImager.zip
- Contains of following files:

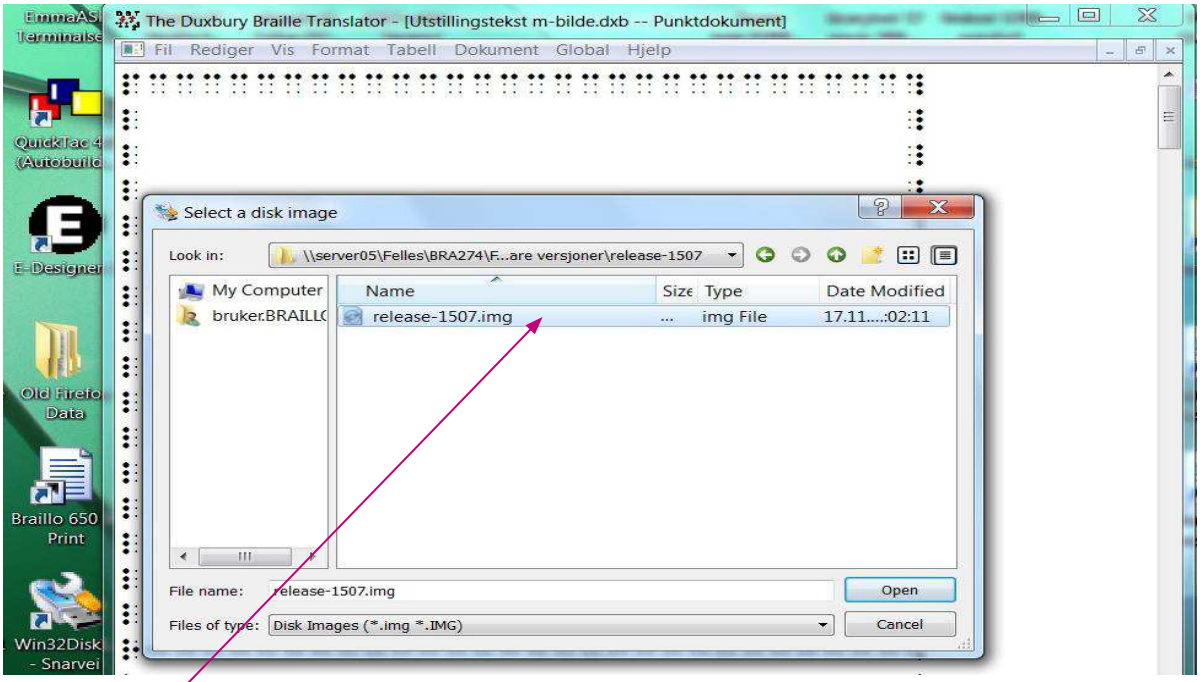


2. release-15xx.img
This is the FirmWare that should be written to the SD-VCard.

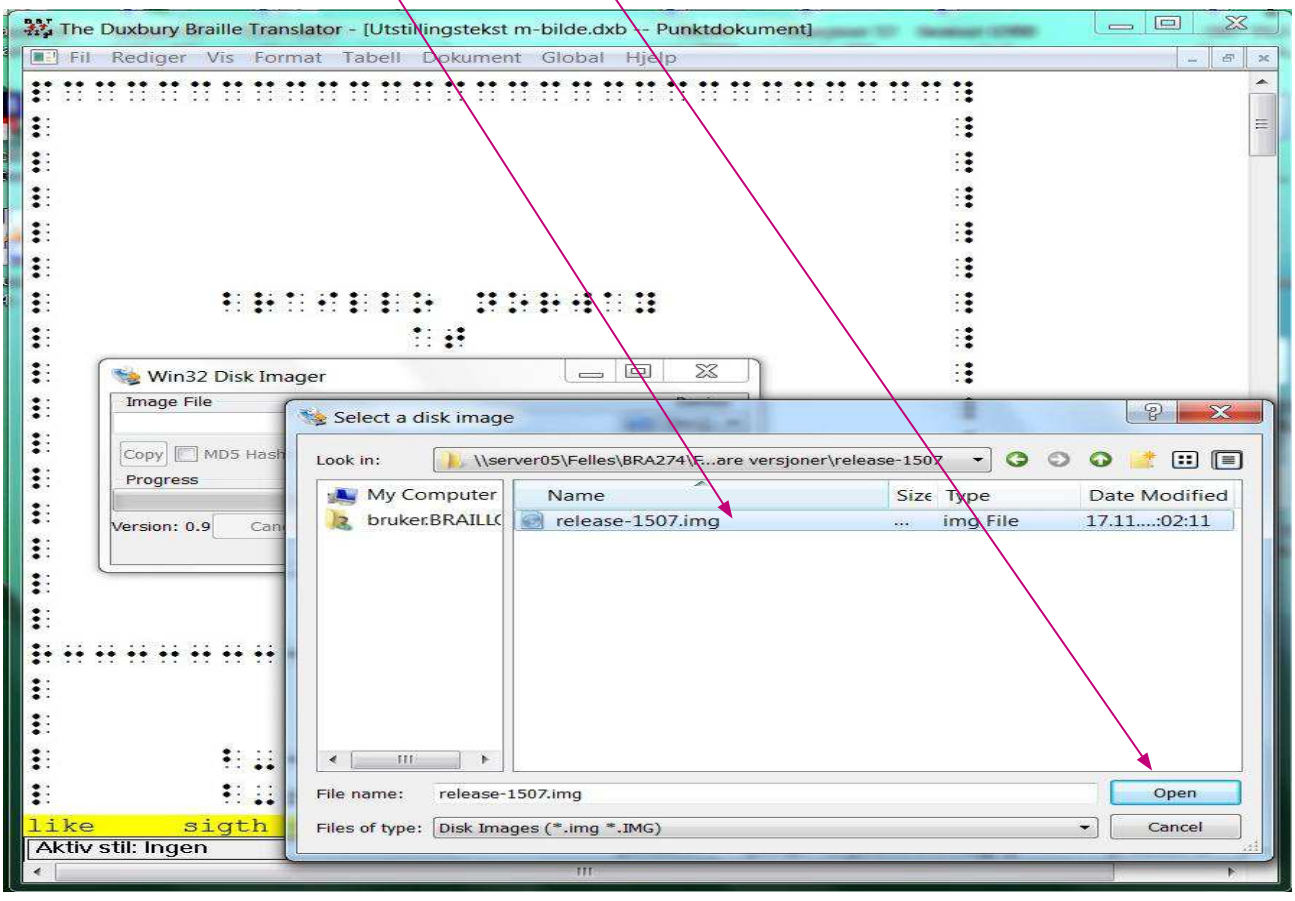
Open the the Win32DiskImager.zip file and start the Win32DiskImager.exe.

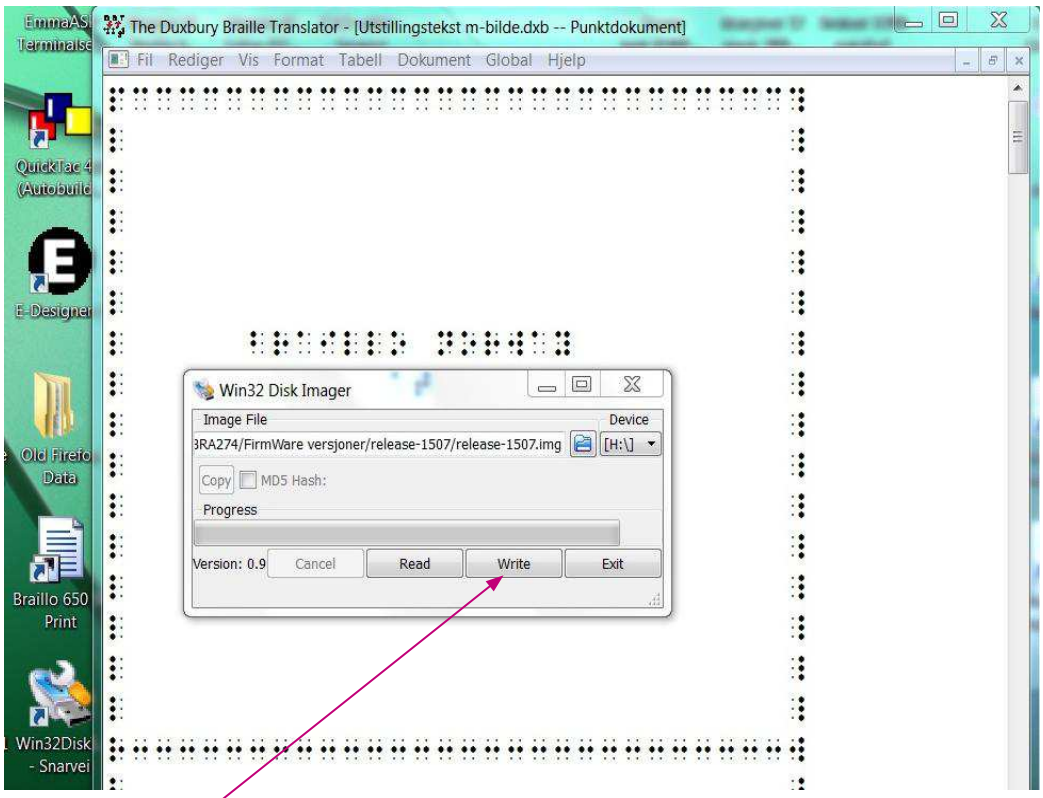
then the program will start as this:



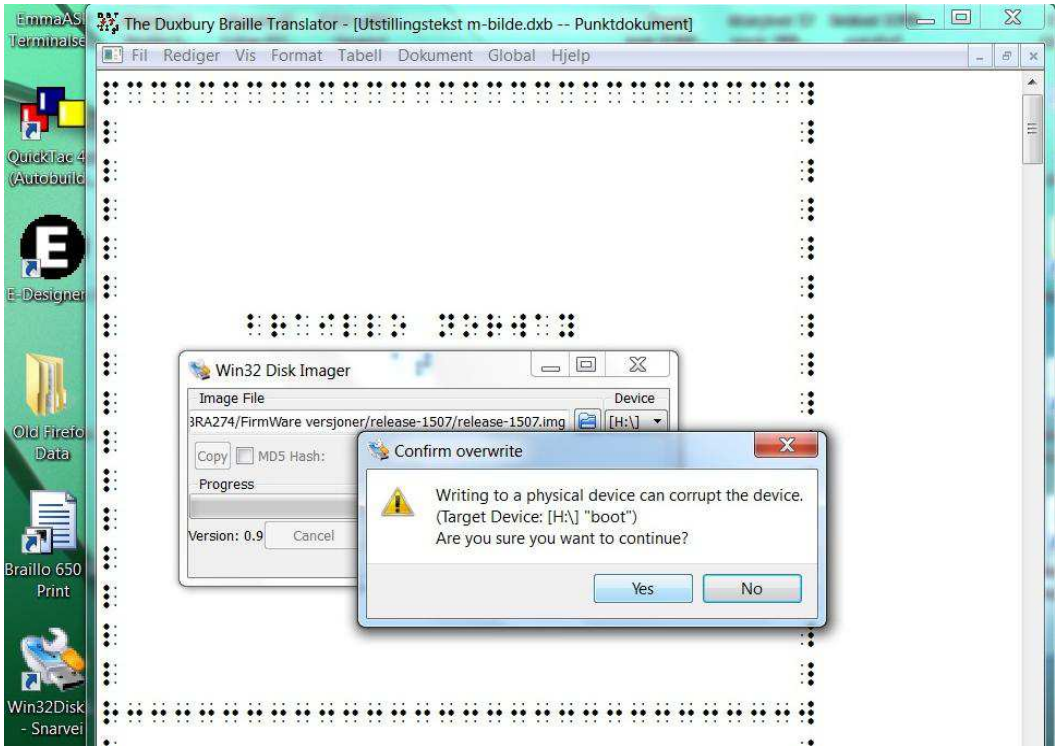


Then select the release version and press open

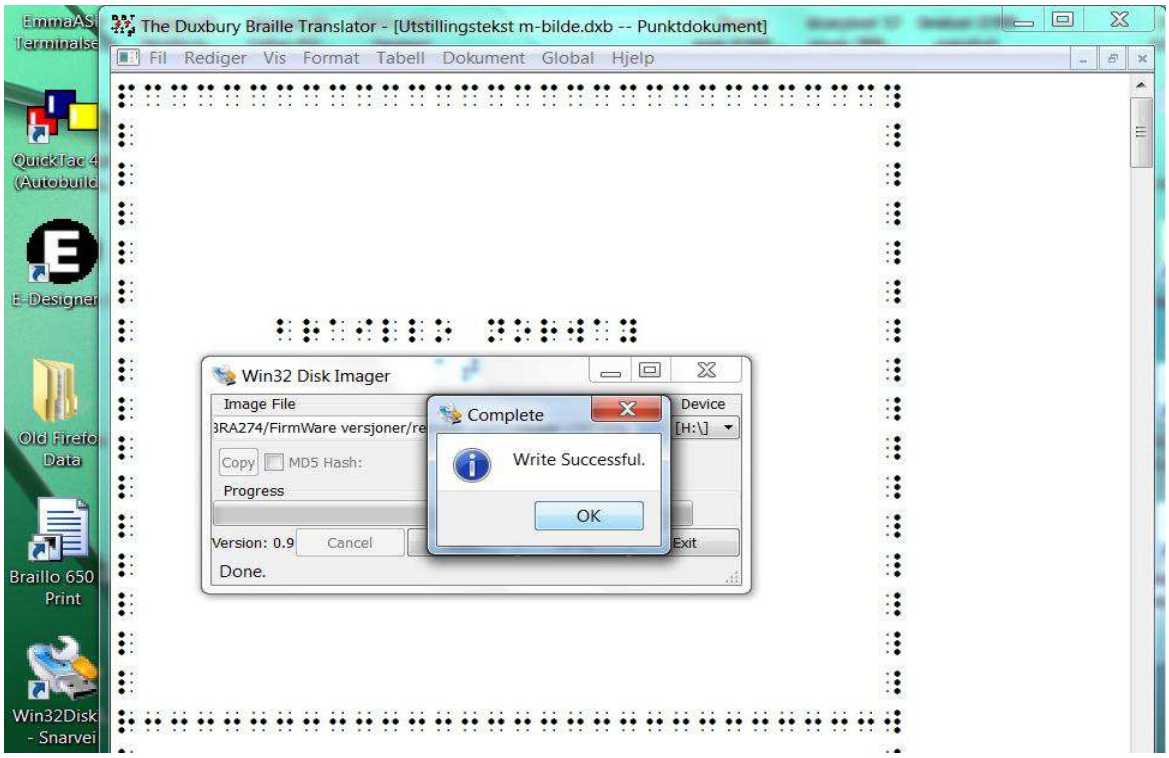




Then press write



Then press yes and the program will write the firmware to the SD-Card.



Then press ok and the SD-Card is ready for use

if you look at the SD-Card with a browser you should find 3 files as below.
